OVERVIEW	Motivated and detail-oriented Mobile and Web Developer with hands-on experience developing responsive web applications and mobile applications using modern technologies. Experienced in Flutter, Dart, Java, React, Node.js, Spring Boot, PHP, JavaScript, HTML, CSS, Bootstrap, jQuery, and Firebase, with database experience using MySQL. Have developed and contributed to individual and group projects including tourism applications, vehicle booking systems, management systems, e-commerce applications, and healthcare channeling platforms. Strong understanding of application development, database integration, responsive UI design, and full-stack development, with a passion for learning new technologies and building user-friendly, reliable software solutions.
----------	--

EXPERIENCE	Software Development Intern – 04/2025– 01/2026 Esupport, Rajagirita Designed, developed, and maintained mobile and web applications in alignment with business and user requirements. Developed scalable and reusable code components while following clean coding and best practices. Identified, debugged, and resolved application-level issues to improve system stability and performance. API tesing with all bug reports, maintaining all test cases and finding solution for all identified bugs.
------------	---

PROJECTS	• Text-to-Speech AI Web Application Developed an AI-powered web application for converting text into speech and generating voice-based content. Integrated generative AI capabilities, mood-based voice features, audio visualization, and real-time communication functionality. Technologies: React, TypeScript, Tailwind CSS, Gemini API, WebSockets, Text-to-Speech, Generative AI • TimeTicker – Stock & Parts Management System Type: Application Development Developed a standalone inventory management application for managing stock and parts. Implemented features for stock tracking, item management, inventory monitoring, and lifecycle management through a user-friendly interface. Technologies: Java, MySQL • LK Shoe – E-Commerce Platform Type: Web Development Developed a responsive e-commerce platform for a Sri Lankan shoe store using a modern dark-themed interface. Implemented an animated admin dashboard, responsive UI components, product management features, and smooth page transitions. Technologies: React 18, Vite, JavaScript, Framer Motion, CSS
----------	---

- **Student Management System – REST API**

Type: Backend / REST API Development

Developed a RESTful API for managing student records, courses, grades, and academic information. Implemented CRUD operations, authentication, data validation, and structured API endpoints for efficient student data management.

Technologies: REST API, Java, Spring Boot, MySQL

- **QuickGuide Sri Lanka – Tourism Platform**

Type: Web Development / Undergraduate Research Project

Developed a tourism web platform connecting travelers with certified local tour guides and supporting itinerary planning. Implemented structured management features to support digital tourism services and improve the organization of travel information.

Technologies: React, Node.js, MySQL

- **QuickDine – Restaurant Table Booking & Management System**

Type: Full-Stack Web Development

Developed a full-stack restaurant reservation and management platform that enables users to discover restaurants, check table availability by date and party size, and manage bookings. Designed an intuitive interface for streamlined restaurant and reservation management.

Technologies: React, Node.js, MySQL, REST API

EDUCATION

Higher Diploma in Information Technology offered by SLIIT Academy (2021–2023)

SLIIT CITY UNI

2nd Class Upper division B.Sc.(Hons) Software Engineering

University of Bedfordshire (2026)

Flutter Certification

Frankling Training

SKILLS

Programming Languages:

Java, C/C++, JavaScript, PHP, Dart

Front-end Technologies:

Tailwind CSS, HTML5, CSS3, React

Tools & Platforms:

Git, Figma, Trello

Back-end Technologies:

PHP, Nodejs

Databases:

MySQL, PostgreSQL, MongoDB

Automation

Playwright, Postman, Selenium
